

BenchMate™ Accessory Kit

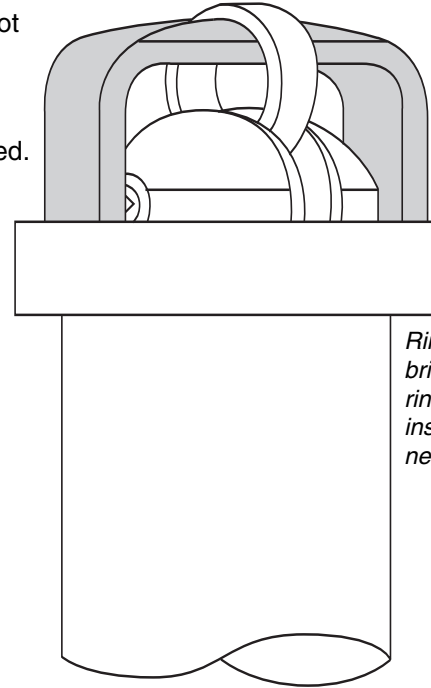

The hex head bolts in this package may be used to replace the pivot Knob A and/or Knob B if you need greater friction. Tighten with any 0.5" wrench. (See step 2 in the main BenchMate instructions for more information.) The drawing at the right shows how to use the ring channel bridge for supporting rings from the inside when desired.

This package contains:

- 2 - #002-743 3/8"- 24 x 1.25" long hex bolts
- 1 - #004-177 ring channel bridge
- 4 - #004-090 replacement BenchMate jaw liners
- 5 - #002-515 wood screws
- 1 - #002-513 plastic thumb screw
- 1 - #002-742 3/16" hex wrench
- 1 - #002-429 5/32" hex wrench
